

Criteria for the acceptance of end-of-life tires:

We are pleased to accept your end-of-life tires and recycle them in our thermolysis plant. The raw materials recovered through this process are used in the manufacture of new products, thereby actively promoting the concept of a circular economy. By partnering with us, you, too, can help protect our environment.

1. Acceptable tire types*:

- Passenger cars
- Trucks
- Light trucks
- Motorcycles
- Agricultural tires

*Tires must be without rims and have a maximum diameter of 1.20 m and a width of less than 50 cm

2. We do not accept the following end-of-life tires:

- Tires with a DOT date prior to 2011
- Silage tires
- Tires with algae or moss growth
- Tires with rims
- Tires with inner tubes and valves
- Solid rubber tires (e.g., forklift tires)
- Seal and Silent tires
- Unvulcanized tires
- Aircraft tires

The following conditions apply to the acceptance of tires:

1. Tires must be free of foreign materials and heavy contaminants (e.g., dirt, mud, stones, metal, etc.)
2. Tires must be delivered exclusively in clean transport containers
3. Unloading with a forklift is not possible
4. Deliveries from EU and non-EU countries are possible by prior arrangement. The same acceptance conditions apply here, in compliance with the relevant waste regulations.

The customer is solely responsible for ensuring compliance with the above criteria.

Goods Inspection/Contaminants/Defective Items

- A comprehensive inspection of incoming goods is conducted only when the vehicle and/or container is unloaded.
- If significant contamination is detected during unloading, we reserve the right to halt the unloading process, reject the delivery, and have the driver reload the delivered tires.
- If contaminants or individual misdeliveries are detected during unloading and inspection of the goods, additional sorting and disposal costs will be billed (unless the tires are taken back), or the tires will be returned as a misdelivery at the supplier's expense.
- The supplier will be informed of the foreign materials/contaminants or misdelivered items via the weighing slip to be signed by the driver and will also be provided with corresponding feedback, including photographic documentation.
- In the event of non-compliance with the acceptance criteria and depending on the necessary sorting expenses, Pyrum Innovations AG is entitled to invoice the supplier for the following additional costs.

Fee / Tires from 2.1 to 2.10 (per tire)	EUR 5.00
Fee / Tires from 2.8 (per tire)	EUR 10.00

If additional costs are incurred for sorting:

Labor / hour / employee for sorting work	EUR 45.00
Machine use / hour (including operator) for sorting work	EUR 95.00

(Charges are billed in 15-minute increments for expenses that exceed the normal scope of unloading.)

We accept end-of-life tires only by prior appointment via entsorgung@pyrum.net.

- **Commercial Customers**
Monday – Friday: 7:00 a.m. – 3:00 p.m.
- **Residential customers**
Friday: 12:00 p.m. – 3:00 p.m.

If you have any questions regarding the acceptance criteria for your tires, please feel free to contact us at entsorgung@pyrum.net.

We would be pleased to provide you with a customized quote for the disposal of your end-of-life tires. Please contact sales@pyrum.net for more information.
